🛡 **Johns Hopkins University Applied
Physics Laboratory**

🔴 **Cornell University**

About

• Over thirty years of experience in research and technology transfer for a wide range of technologies.
Strong interest in building and nurturing high performance research and technology development
organizations that create mission oriented game changing solutions.
• As the Director of the Milton S. Eisenhower Research Center (MERC) at Johns Hopkins University
Applied Physics Laboratory (JHUAPL), developed research vision, investment strategies, and business
development strategy for external sponsorship. Built a strong portfolio of externally sponsored research
programs and managed a staff of about 160 to execute the programs. Technology areas included
communication and networking technologies, information security, sensors and sensor networks,
information extraction and knowledge management, image/video processing, autonomous systems,
social network modeling and human dynamics, biological technologies and bioinformatics,
electromagnetic propagation, nanotechnology, and advanced materials.
• As a Senior Director in Advanced Communications Technologies Center in Bell Labs, managed a
research staff of between 70 and 160 people working on the advanced communications protocols and
controls for wireless and optical systems and Internet. Between 1996 and 2003, his organization his
organization published over 500 papers, obtained over 400 patents, and contributed to many standards.
Technologies developed were implemented in key commercial products.
• As the Director of Transformational Communication in JHUAPL, helped design the architecture and
protocols for the Global Information: high assurance networking, information security, Quality of Service
based on local and global mechanisms, and scalability using hierarchical decomposition of the network.
• Personal research in advanced communications and networking technologies. Published over 115
papers and obtained 45 patents. Fellow of Bell Labs and Fellow of IEEE. Distinguished Alumnus of IIT
Bombay.

About

The world has changed. So has the way you've "always done business." Is the fear of embracing digital transformation holding your company back?

Micro Focus helps customers pursuing a digital transformation strategy find a balance between speed and pragmatism. Our software removes the need to take the risky "rip and replace" approach so you can run and transform at the same time.

This allows you to adapt to evolving market conditions while also exposing new opportunities to achieve long-term success in the digital economy.

👉 We call this Smart Digital Transformation.

With a broad portfolio that addresses all four core pillars of digital transformation, we're uniquely positioned to deliver on your primary needs.

◇ We deliver a holistic set of integrated solutions, so our customers can digitally transform according to their unique needs and priorities.

◇ We allow customers to bridge the existing and the emerging, so they can run and transform the business at the same time.

◇ We supplement our solutions with an advanced analytics ecosystem to deliver optimal insights and efficiencies. We provide a choice, and deliver maximum flexibility, to remove barriers to strategic initiatives.

◇ We put our customers at the center of our universe and deliver what they truly need, which we call customer-centric innovation.

At Micro Focus, we offer Application Delivery Management software and solutions that enable your team to deliver high-quality apps with greater speed and agility.

Building a resilient approach to remote working
Digitalization World · May 10, 2020

In responding to the COVID-19 pandemic, businesses across the world have had to make rapid changes to their working processes, rolling out capacity for remote work, online collaboration, and access to essential data and tools to whole workforces. Micro Focus Global Head of Strategy and Solutions, Joe Garber, discusses the potential benefits of working-from-home, and the shift in thinking from IT teams as businesses adapt to the existence of walls beyond the office.

Anurag Srivastava

Unlocking shareholder value with expertise in strategy, corporate finance and M&A (FIS | McKinsey | NYU)

Cincinnati, Ohio · 326 connections

Sign in to Connect

Fis **FIS**

NYU STERN **NYU Stern School of Business**

About

Experience summary:

• 20+ years of total work experience. 12+ years in Investment Banking, Management Consulting and Corporate roles covering broad array of Strategy and Corporate Finance topics.

• Senior executive with a strong track record of building and leading high-performing teams, and directly working with top leadership (Board members, CEO, CFO, COO) to drive enterprise decision-making.

• Broader leadership experience of tackling a range of strategy and finance topics, including corporate strategy, growth strategy, strategic / financial planning, portfolio management, capital allocation, performance management/KPIs, M&A diligence/integration, capital markets, and investment valuation.

• Deep expertise of bringing shareholder value perspective to enterprise decision-making on Strategy, Finance and Transaction topics. Deep know-how of linkages between operating performance and company's capital markets performance as well as investor / analyst perspective.

Recommendations

A preview of what LinkedIn members have to say about Pankaj:

" I worked under Pankaj for a period of 6 months as part of a venture/startup within Bell Labs. He has admirable qualities as a manager and simply gets the best of you. He seemed to be able to handle so many resposibilities with hardly any sweat. The best part is that working with Pankaj is lots of fun as well as hard work. We were able to deliver on all our deliverables but at the same time have lots of fun solving technical puzzles, brain teasers etc which are not really work related. Pankaj's abilities in recruiting the right folks and interviewing are very good. Lastly being technically excellent Pankaj almost always came up with great technical ideas/suggestions which helped the project to a large extent.
